

Chapter 14: Division (2, 3, 4, 5, 10)

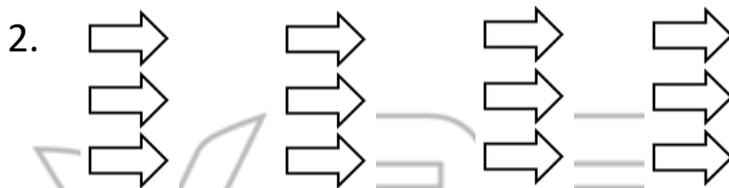

i. Write division sentences for each group.

There are 4 hearts with 2 hearts in each group.

There are ____ groups of hearts.

So, $4 \div \underline{\quad} = \underline{\quad}$

There are 12 arrows with 3 arrows in each group.

There are ____ groups of arrows.

So, $12 \div \underline{\quad} = \underline{\quad}$

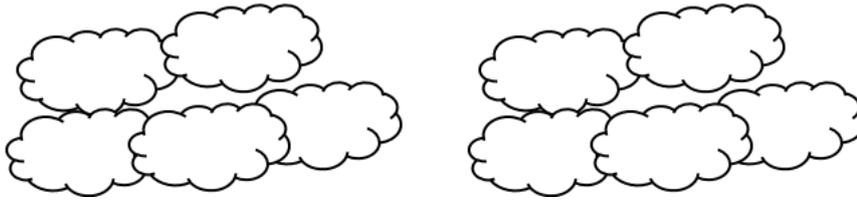

There are 20 stars with 4 stars in each group.

There are ____ groups of stars.

So, $20 \div \underline{\quad} = \underline{\quad}$

4.

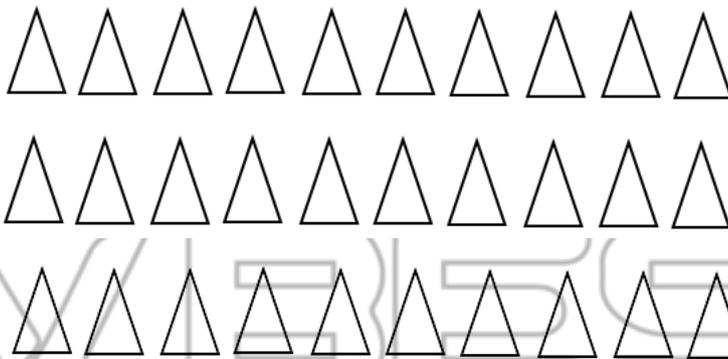

There are 10 clouds with 5 clouds in each group.

There are ____ groups of clouds.

So, $10 \div \underline{\quad} = \underline{\quad}$

5.

There are 30 triangles with 10 triangles in each group.

There are ____ groups of triangles.

So, $30 \div \underline{\quad} = \underline{\quad}$

ii. Division by 2.

1. $12 \div 2 = \underline{\quad}$

4. $6 \div 2 = \underline{\quad}$

2. $10 \div 2 = \underline{\quad}$

5. $18 \div 2 = \underline{\quad}$

3. $2 \div 2 = \underline{\quad}$

6. $24 \div 2 = \underline{\quad}$

iii. Division by 3.

1. $21 \div 3 = \underline{\quad}$

4. $24 \div 3 = \underline{\quad}$

2. $9 \div 3 = \underline{\quad}$

5. $18 \div 3 = \underline{\quad}$

3. $12 \div 3 = \underline{\quad}$

6. $3 \div 3 = \underline{\quad}$

iv. Division by 4.

1. $16 \div 4 = \underline{\quad}$

4. $24 \div 4 = \underline{\quad}$

2. $4 \div 4 = \underline{\quad}$

5. $40 \div 4 = \underline{\quad}$

3. $36 \div 4 = \underline{\quad}$

6. $8 \div 4 = \underline{\quad}$

v. Division by 5.

1. $15 \div 5 = \underline{\quad}$

4. $25 \div 5 = \underline{\quad}$

2. $10 \div 5 = \underline{\quad}$

5. $40 \div 5 = \underline{\quad}$

3. $50 \div 5 = \underline{\quad}$

6. $5 \div 5 = \underline{\quad}$

vi. Division by 10.

1. $10 \div 10 = \underline{\quad}$

4. $250 \div 10 = \underline{\quad}$

2. $70 \div 10 = \underline{\quad}$

5. $100 \div 10 = \underline{\quad}$

3. $50 \div 10 = \underline{\quad}$

6. $40 \div 10 = \underline{\quad}$

vii. Solve the word problems using division.

1. Five people wants omelettes for breakfast. If there are fifteen eggs, how many eggs are needed for each omelette?

2. Kelly's mom brought 30 pizza rolls for the 6 girls at the party. How many pieces did each girl receive?

3. Mrs. Curry has 100 stickers. She wants to give an equal number to 10 students. How much stickers will each student get?

viii. Remainders

1. There were 15 marbles in the jar. The marbles were shared between 2 people.

Each person got _____ marbles.

There was _____ marble left over.

2. The greengrocer shared 37 apples between 5 customers.

Each of the customers got _____ apples.

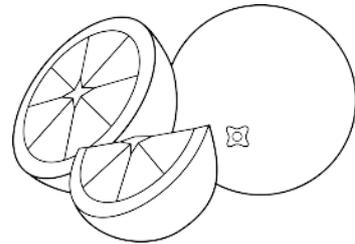

There were _____ apples left over.

3. There were 25 oranges in the box that were shared between 10 people.

Each person got _____ oranges.

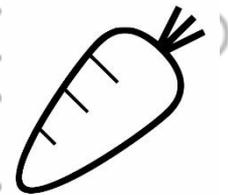

There were _____ oranges left over.

4. Toby shared 44 carrots between 5 people.

Each person got _____ carrots.

There were _____ carrots left over.

5. Amy had 25 roses that she shared between 2 vases.

Each vase had _____ roses in it.

There was _____ rose left over.
